Instructional Unit Critique Packet
INSTRUCTIONAL UNIT: SAP Basic Navigation Unit 1
06/21/2023

This packet provides you with several tools to help you design, develop, and critique instructional units. It is helpful to review it *PRIOR* to starting an instructional design project, *DURING* each phase of instructional design, and at the *END* point when the instruction will be reviewed or implemented. Thus this packet acts as an advance organizer, status checkpoint support, and final critique for instructional design projects.

BY: B. Woodell

Date:

**MULTIPLE PERSPECTIVES:** The first tool is the "Multiple perspectives ... Thinking like... instructional designers, instructors, and learners" checklist. In each section you are prompted to think about key questions that each of these stakeholders ask when reviewing overall quality of instruction to prompt content learning.

**EVENTS OF INSTRUCTION:** The second tool is a rubric based on Gagne's 9-events of instruction and related instructional design and learning principles. Gagne studied the cognitive functions of learning and found that when external variables (instruction) aligned with each of the nine (9) internal cognitive learning functions, learners were more likely to learn content through the instruction. This rubric queries each of the 9-events and prompts for the strength of each event as represented in the instruction. Sub-queries relate to specific instructional and theoretical principles of importance. Your role is to review the target instructional unit, rate each element, sum the column ratings, add column ratings together and write the total score to the title line of the page. The higher the score (out of 75) the stronger the instructional unit is in including the 9-events of instruction.

**INSTRUCTIONAL AND MESSAGE DESIGN:** The third tool is a quality rubric for specific instructional design and message design principles. Your role is to review the target Instructional Unit and rate each item. The higher the score (out of 50) the stronger the uses of instructional design and message design principles.

**OVERALL RATINGS:** The final three questions prompt an overall rating for the unit's instructional quality, creativity in learning design, and use of instructional and message design principles. The broad nature of these questions require that you think about the instruction in multiple ways – from the three perspectives of ID, instructor, and learning ... the use of 9-events... the incorporation of instructional design, learning, and message design principles.

Confluence of these reviews: The first tool prompts you to think about the overall Instructional Unit from *different* perspectives. The second two tools will be helpful in identifying the Instructional Unit's areas of strengths and enhancements, from learning and instructional principles. The third tool prompts for overall rating across the unit. It is critical to be honest in reviewing and rating each item in each of the checklists and rubrics.

These ratings are not easy to determine, given the complex nature of learning, instruction, message design, and multiple stakeholders involved with instruction. However this type of thinking and reflection can help you develop a deeper understanding of instruction and the complex relationships among instruction, learning, messages, and delivery. This can be helpful in predicting how successful an Instructional Unit under review will *perform*, and support learning, when it is implemented.

Multiple Perspectives Review for UNIT: SAP Basic Navigation Unit 1  By:						
Thinking like instructional designers, instructors, and learners						
AS AN INSTRUCTIONAL DESIGNER For unit	No ☑	Partly ☑	Yes ☑			
• do instructional goals, learning objectives, strategies, technology tools, assessments align with each other?	H					
• do instructions/guidelines clearly describe assignments (e.g., introduce, explain goals of activities, describe how to complete the assignment, provide learning outcomes, describe how learning will be assessed)?						
do assignments include a summary/debrief to help learners reflect on new content?			$\boxtimes$			
• is there integration of communications among instructor, peers, and/or others?			$\boxtimes$			
• are there clear grading guidelines or rubrics to support each assignment?						
• do resources (e.g., readings, graphics, manipulable resources, media ) support (focus on) expected learning?			$\boxtimes$			
• is it organized in a logical order that supports learner navigation through the content presentation,			$\boxtimes$			
assignments, activities, and assessments? (identify key tasks, resources, etc.)	П					
are graphics, motivational features, interactive events, resources purposefully integrated?						
For resources, do they	✓	☑	☑

Events Review Rubric for UNIT: SAP Basic Navigation Unit 1	By:	<b>Events Score: 0</b>
--	-----	------------------------

**Overview:** Use rubric to critique Instructional Units using Gagne's **9-events of instruction** and other instructional design principles. Rate each item from 1 (Weak) to 5 (Strong), if an element is **missing**, rate it NA. Total columns below.

	NA	Weak		Moderate		Strong
	(0)	(1)	(2)	(3)	(4)	(5)
		Weak/ erroneous		Moderate Coverage		Multi-faceted Coverage
Gain attention to unit content		☐ Prompts not related to		□ Prompt on content or		☐ Prompt content attention,
(any of a number of ways to draw		content and/or activity		recall prerequisites		recall of prerequisites,
attention to content of unit)						exploration of content
Establish learning objective(s)		☐Poorly stated, vague on		☐Simple statement of		⊠Give to, or collaboratively
(Give or work with learners to		content learning		content learning outcomes		define objectives with
define expected content learning)		outcomes				learners, align w/content
Formatted learning objective		☐Focused on activities, not		☐Uses behavioral format,		⊠Correct format, clear links
(observable learning outcomes,		learning outcomes, not		some not content learning		to content outcomes
not focused on activities)		behavioral		outcomes		
Objectives aligned with type/		☐Unclear type and/or level		☐Clearly states type and		⊠Correctly states type / level
level of learning (knowledge,		of learning		level learning; vague or		of learning and aligns with
skills, attitudes; high-low level)				unclear alignment		activities/ assessments
Prompts prerequisite knowledge		☐Unclear what		☐Prompts prerequisites, but		☑Prompts prerequisites,
(helps learners recall related		prerequisites are required		not always clearly aligned		clearly aligned to new
background content)				with new content		content and activities
Present / provide content (any of		□No new content		☐Content delivered to		⊠Content provided in
a number of ways to deliver		presented/ provided, or		learners, uses multiple		multiple ways and formats,
content during unit, (e.g., read,		vaguely presented/		delivery (e.g., books,		given or learner generated
view, manipulate, discuss, search)		provided		video, articles, pictures)		
<b>Appropriateness of Content</b>		☐Content vaguely		☐Aligned with objectives,		☑Present or prompt learner to
(content aligned with learning		presented, not clearly in		single strategy in one		find content, many
objectives)		support of objectives		format /perspective		strategies support objectives
Provide learner guidance (e.g.,		☐Little evidence of		☐Guidance tool provided to		
advance organizers, rubric,		guidance materials or		support content review		tools/ strategies provided to
discussion outlines, debriefs, etc.)		strategies				support content review
Engage learner in practice (clear		☐Little/ unclear direction		☐Clear directions for		⊠Clear directions, multiple
directions, appropriate strategies,		for practice, strategies not		practice, strategies aligned		ways to practice content,
alignment to learning objectives)		aligned to objectives		with objectives		aligns with objectives
Prompt physical interaction		☐Little physical interaction		□Prompts specific types of		Multiple types of physical
with content (e.g., takes note,		with content		physical interaction with		interaction with content,
highlight, manipulate, build)				content		aligns with deeper learning
Prompt mental engagement		☐Little mental/ cognitive		☐Prompts mental/ cognitive		Multiple types of cognitive
with content (e.g., reflection,		engagement with content		engagement with content		engagement with content,
thinking-sharing)						aligns with deeper learning
Prompt flexible interactions		☐Little flexibility in		☐Prompts at least two		⊠Prompts multiple
with content (e.g., various		perspective, viewing, and		perspectives of content,		perspectives through
perspectives, various media)		interacting with resources		few media types		multiple media types
Provide learner with feedback		☐Little evidence of		☐Simple feedback (e.g.,		Multiple feedback types;
(e.g., various formats-text, verbal,		feedback or reflection		correct/ incorrect) during		developmental (e.g.,
graphic; various types-corrective,		prompts on practice and		practice and assessments		confirming, corrective),
supportive, progress)		learning assessments	_	prompts reflection		reflection, progress maps
Help learner transfer knowledge	ΙЦ	☐Little evidence of	Ш	☐Strategies (cases, projects)	Ш	
(e.g., apply content within unit, to		supporting knowledge		to support knowledge		knowledge transfer within
prior/next units, outside unit)		transfer within and		transfer within course;		& outside course; work with
	_	outside of course	_	some outside transfer		clients, audiences, etc.
Assess content learning (e.g.,		□Vague measures, mono-		□Clear measures (multi-		☐Multiple measures / testing
single measure, multiple		level; lack alignment to		level) aligned with		strategies aligned with
measures; surface to deep		instructional strategies		learning objectives and		learning objectives and
learning)		and objectives		instructional strategies		instructional strategies
